-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-19 have been considered but are moot in view of the new ground(s) of rejection.

Claim Objections

Double Patenting

2. Applicant is advised that should claims 1-5 be found allowable, claims 6, 7, and 12 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof.

When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

Art Unit: 3737

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Wood et al. (2002/0070970).

With regards to claims 1-19, Wood et al. teach a diagnostic medical imaging system and method to generate 2D first and second image slices, data processor to combine said slices, storage device for loading the first and second image slices, and displaying said slices in various view ports such that the first image slices are displayed in a second view port, the second image slices are viewed in first view port, and a third view port containing a superimposed version containing relative locations of both first and second image slices as represented in the second and first view ports, respectively ([0043] [0046] [0055]). Wood et al. teach designating regions of interest by a reviewer ([0044] [0046-0047]). Wood et al. teach obtaining the images from a coronal, sagittal, or multi-planar view ([0045]). The reference also teaches updating the display of the various view ports in response to changes made to one view port ([0046] [0088] [0091], claims 7-14). Wood et al. also teach detecting small objects or lesions on a particular slice, marking or projecting outlines of said objects, and highlighting or color coding to distinguish between objects ([0047] [0051-0055] [0060] [0065] [0095]).

3. Claim 19 is rejected under 35 U.S.C. 102(e) as being anticipated by He et al. (6275562). Applicant's attention is re-directed to the abstract in lines 5-9 and specification which clearly states that images can be combined to form a reduced

number of thicker slices and then if necessary, may form a plurality of thin slices (col. 4 lines 27-31, col. 5 lines 20-32), storage, and display of selective images and parameters (col. 5 lines 1-19 lines 58-67, col. 6 lines 1-18).
